GEOMANCY: A SYSTEM OF CONSTRUCTING A PREDICTIVE FIGURE ACCORDING TO THE RULES OF EARTH MAGIC - Paul Ng

A. OVERALL PROJECTION

This is the twentieth year of the Lower “8” Cycle of the world. Based on Yi-Jing, while the period between 1984 and 2043 (totaling 60 years) is “Fire-Wind Caldron”, the year 2024 is “Thunder-Fire Abundance”.

Yi-Jing Analysis

The Yi-Jing “Thunder-Fire Abundance” trigram is a trigram of luck and wealth. The world economy would show signs of improvement. Nevertheless, there would still be wars. It would also be a hot year with many fire issues. Among countries, controversies and fighting for superiority would continue.

Life Chart Analysis

The four columns of this year are “Wooden Dragon” year, “Fire Tiger” month, “Earth Dog” day and “Metal Monkey” hour. While the year and day are opposite, the month and hour are also opposite. Strangely, the year and hour quietly connect. The month and day also quietly connect. That hints of many unstable relationships among countries. Many promises would be made and then broken. Favorable elements are “fire, earth and wood”. Unfavorable elements are “metal and water”. Real Estate, pharmaceutical, education, high tech, textile and forestry would do well. Logistics, travel, metals, automobile and insurance sectors may need to struggle a bit. Artificial Intelligence and Big Data would lead the world’s developments.

Flying-Star Analysis

The controlling Star of this year is “3-Blue” Arguments. This is a year of controversy and arguments. However, the governing trigram is “Thunder-Fire Abundance”. Most countries will go through a stage of economic recovery. Most conflicts from the western countries would be against China.

Generally speaking, unfavorable countries are those in the South, West and South-East, such as Southeast Asia, India, Africa, Australia, USA, South America, Western Europe, etc. Favorable ones are those in the central region, East, North-East, North, North-West and South-West, such as China, Eastern Europe, North Europe, Korea, Japan, Canada, etc. China will begin its 40-year high life cycle.

The following would outline an analysis of orientations, businesses, politics, economies, climate and health, totaling 6 important factors affecting all of us.

B. LOCATIONS and ORIENTATIONS

Central (positive)

The controlling force is the central “Thunder-Fire Abundance” trigram. Countries in this space would tend to prosper economically. China will march out of last three years mini recession. Western countries headed by USA would still pick on China.

Middle East countries continue to be volatile. Troubles between Israel and Palestine would be the highlight.

East (positive)

The “1-White” Romance Star will land in the East. It is also the “Speculative Money” center. Most eastern countries would do well, such as China’s eastern provinces and Japan. However, there would be many water issues in those regions.

South-East (negative)

This is the “2-Black” Illness Center. There would be new forms of sickness. This region includes Southeast Asia, the Caribbeans and Florida in USA, etc. However, Real Estate may appreciate and do well in such areas.

South (very negative)

This is the “7-Red” Fighting Star, together with the “Preponderance of Wind” trigram and “Triple Conflict” force. Both politics and economy may incur much instability. There would be plenty of wind and water problems. Climate in such regions would be very unstable. These include Mexico, South America, India, Africa, etc. Robbery and murders would be serious.

South-West (very positive)

This is the “9-Violet” Joy and Wealth Center. The trigram is “Possession in Abundance”. On the positive side, countries in South-West regions such as Spain, Portugal, France, USA’s South California, Canada’s BC and China’s Sichuan would do very well economically. On the negative, these regions also suffer a lot of heat and even forest fires.

West (very negative)

This is the “5-Yellow” destructive center. Western countries, such as the USA and UK, would see their economies retreat. There would be plenty of natural and man-made disasters. Earthquakes and drought would be likely.

North-West (very positive)

This is the "4-Green" Learning Center. This represents learning, research work and technical developments. Hence Northern European countries tend to do well. There may be plenty of wind and water storms in the North-West regions of USA and Canada.

North (negative)

This is the “8-White” Retreated Money Center. Economies in Northern countries would be volatile. However, real estate market may improve, especially in Canada. Russia, on the other hand, may suffer from the after-effects of the war.

North-East (very positive)

This is the "6-White” Travel Center. The travel industry may prosper in Northeast countries, such as Korea, Japan and Northeast parts of China, USA and Canada. However, these areas may suffer from high temperatures and chances of thunder and fire storms.
