**GEOMANCY: A SYSTEM OF CONSTRUCTING A PREDICTIVE FIGURE  
ACCORDING TO THE RULES OF EARTH MAGIC. - Paul Ng**

---

## **A. OVERALL PROJECTION**

This is the seventh year of the Lower “8” Cycle of the world. Based on I-Ching, while the period between 1984 and 2043 (totaling 60 years) is “Fire-Wind Urn”, the year 2010 is “Water-Earth Mutual”.

### **I-Ching Analysis**

“Water-Earth Mutual” contains 1 “Yang” and 5 “Yin’s”. The “yang” is second from the top rapidly rising to override the “yin”. The world would see light after experiencing last year’s darkness.

This I-Ching symbol indicates “water” on top of “earth”. There would still be plenty of flooding world-wide, albeit economically better than last year.

### **Life Chart Analysis**

This year is composed of “metal tiger” year, “earth tiger” month, “wood rooster” day and “earth rabbit” hour. There are 4 wood, 2 metal and two earth elements. Although there are no fire or water elements this chart combination is still quite strong. Hence the favorable elements are “metal”, “earth” and “fire”, while “water” and “wood” are negative elements. The businesses that will resurrect the world economy are most likely the financial and real estate sectors. However, huge volatilities are still inevitable. We must keep this in mind while doing investments.

### **Flying-Star Analysis**

The “8-white” money star is the controlling force of this year. This is an earth sign that represents wealth. One phenomenon stands out this year. That is, all the stars will duplicate in their respective positions. This means such changes may happen from time to time. All good things can only be obtained with great efforts.

The following would outline an analysis of orientations, businesses, politics, economies, climates and health, totaling 6 important factors affecting all of us.

## **Locations and Orientations**

### **Central (positive)**

The controlling force is the central “8-white”. This is the money center. Thus China will escalate quickly to the financial center of the world. However, there would still be instabilities among its minority tribes. Mid East countries would continue to be volatile. Their politics & problems would persist.

### **East (positive)**

This is the “6-white” center. Although it is a receding center, it still benefits in the generation of wealth. Places such as Japan, Shanghai, Shandong would perform very well. Canada’s Toronto will continue to enjoy its boom in real estate, especially the east end of Markham and Scarborough where there would be a lot of moving activities.

### **South-East (negative)**

This is the “7-red” center, representing robbing and legal conflicts. It is also the receding money center. There would be a lot of instabilities in South-Eastern countries, such as Thailand, Philippines and Indonesia. They may include political, economical and natural disasters. People living in Canada’s Scarborough should be careful about their home securities. There would be controversies in the economic development in the Hong Kong-Pearl River triangle. The former political party in Taiwan would be making a lot of noise. The good news is that there would be plenty of marriages and happy events in the south-east regions.

### **South (negative)**

This is governed by the “3-blue” star, which represents arguments or robberies. This is typified by southern countries such as South America, Africa and India.

### **South-West (very negative)**

This is the “5-yellow” center. It represents natural and people disasters. China’s Tibet would continue to have hidden problems. There would be earthquakes outside California and south-west Pacific Ocean, which may cause a minor tsunami. Even Sichuan or Yunan may experience some minor earthquakes.

### **West (half good-half bad)**

This is the “1-white” center. It represents romance, learning, travel and robbery. Hence countries such as Europe and USA will see an improvement in their economies. In Europe, there

would be a lot of petty crimes such as pick-pockets. Western China's Xinjian would enjoy some stability. There would be some sex scandals in western countries. More Chinese beauties would be enrolled into Hollywood.

### **North-West (very positive)**

This is the "9-violet" center, representing joy and fire. On the positive side, there would be plenty of romances leading to marriages. China's north-west development would reap its profits, especially in real estate developments. Many factories tend to move there as well. Countries in Northern Europe would do well. Canada's Vaughan and Brampton would experience a huge increase in their real estate activities.

### **North (negative)**

This is both the "4-green" and "3-conflict" center, which represent great learning power and inventions. However, young children living there should beware of contagious illnesses. Both Canada and Russia would do well economically. However, there may be political problems and controversies.

### **North-East (very negative)**

This is the "2-black" center representing illnesses, especially those involving food. The illness source may originate from north-eastern parts of USA, Canada or China. However, China's north-east provinces would experience a boom in real estate developments.

## **Analysis of Businesses**

Business involving "earth, metal or fire" would do well. Those involving "wood or water" had to work much harder.

Since this year's governing force is earth, real estate becomes the key factor for economic recovery. There would also be breakthroughs in the energy sector. The key areas would be wind, solar, earth and micro electronics.

As Real estate is concerned, China would be the top performer, especially in cities such as Beijing and Xian. In USA, north-eastern states would recover faster than others. In Canada, Toronto, Vancouver, Edmonton and Saskatoon would outperform most other cities. Within Toronto, the jewel belongs to Willowdale, Markham and Vaughan.

Energy is another important business this year. Wind turbines would become more and more popular. We might see them not just on mountains, but also oceans. Solar energy would become very useful in places with more sunshine but less wind – such as deserts. More new houses would extract heat from underground. Even lightings would advance to not just energy savers, but LED's.

Electronics are getting smaller and yet more powerful. There would be controversies and lawsuits, as well as acquisitions in the hi tech sector.

More breakthroughs in stem cell research are on the way, shedding light on curing today's terminal illnesses. More governments in the world would defy religions to accept such technology. However, more problems may surface concerning some traditional drugs.

Food businesses would do well too, especially those targeting weddings and births. Beware of a new wave of food problems.

As metals are concerned, automobiles are coming back alive, thus leading recovery of other related businesses. Chinese cars are gaining more ground, both domestically and exports. There would be a demand for gold and copper.

Travel business would do better in central, western and eastern regions. Although it may still be slow, it has somewhat improved over the past year.

Textile business would still be slow but better than last year.

Both banking and financial sectors would experience a recovery, pushing the stock indices higher. However, volatilities are still unavoidable.

### **Favorable Business (Earth, Metal, Fire)**

- Those driven by new energy sources
- Wind-related businesses, such as wind turbines
- Nuclear energy (with better disposal sources)
- Electronics and computer/storage media, especially those with Nano technology
- Communications and Internets: machines would become still smaller and yet more all-encompassing
- Hi-tech securities
- Household securities
- Education
- Show business
- New building materials
- House renovations
- Food business, especially those targeting weddings
- Automobiles
- Real Estate

### **Unfavorable Businesses (Wood, Water)**

- Clothing
- Fishing
- Travel / Transportation – there would be more aviation companies running into

- financial troubles and air accidents
- Smugglings
- Imports & Exports

## **Analysis of Politics**

The governing sign “8-white” for this year represents wealth. The I-Ching sign “Water-Earth” represents co-operation. More countries would join forces to co-operate to help the economic recovery. The world would seem to be more on an agreeable mood than confrontations.

Both Canada and USA would experience some economic stability, with Canada out-performing USA in the rate of recovery.

Canada’s Alberta and Saskatchewan would become the “money center” of the country, while Ontario, especially Toronto, may see more scandals surfacing.

China would lead the world in economic recovery and really move ahead. There would be high officials stepping down.

Taiwan would intensify its tie with China, laying out a more solid passage to unification of China. Nevertheless, some natural disasters may still exist.

South and North Korea would intensify their talk of peace, which eventually would lead to their re-unification. However, North Korea would still play the “nuclear” card off and on.

Japan would be more stable in its political leadership.

There would be political instabilities among many southern countries, such as South America, Thailand, Philippines and Africa.

## **Analysis of World Economy**

In spite of volatilities, world economy would improve further. However, the amount of debt and deficits may post the major drawback to such efforts. On the bright side, the overall improvement of businesses would help to pay off some of the government debts.

China’s huge economic advances would lure many more countries to do trades with China and even set up companies there.

USA’s recovery may be led by both the automobile and financial industries. Its real estate sector would also improve. However, its astronomical debt and deficits prove to be a deterrent and time bomb to its future prosperity.

Canada is dragged a bit by its deficits. Yet it is also buoyed by both real estate and mining industries. It is particularly helped by immigrants throughout the world.

Russia would do well financially. There would be outstanding scholars and scientific advancements.

Japan would be buoyed by a recovery in its auto industries and its new space programs.

Europe would be helped by its communication and energy sectors.

Southern countries such as South America, South Africa and India would be more volatile. Overall, they would still perform better than last year.

### **Canadian Economy**

- Fiscal deficits may grow at almost all levels of governments
- Interest rates will stay low and prime rates will fluctuate between 2-4%
- Can \$ would fluctuate between \$0.80 and \$1.00 US.
- TSX should fluctuate between 10,000 and 13,000 points
- Corporations would continue to be leaner and meaner with consolidation and centralized control
- Layoffs would slow down
- Many US companies would continue to consolidate
- Many merger activities – “the fit lives”
- Competition among all businesses will be more fierce than before
- Some economic growth (1% to 3%)
- Unemployment rate improves a little (6-8%)

### **Analysis of World Climates**

The world would be a little cooler than last year. There would be plenty of rainfall in eastern, south-eastern and western regions of countries. Flooding may occur in those areas. Northern and central regions may experience draught. North-western regions are prone to fire.

### **Analysis of World Health**

Major health issues would be due to food products. Water cleanliness may be a problem. Northern countries would be prone to contagious illnesses. There would be a new form of flu virus.

### **PROJECTION FOR THE WORLD STOCK MARKETS**

- February            First half of month better than second half
- March:             similar to February
- April:              Positive
- May                 Positive, especially second half
- June                First half negative, second half positive
- July                 similar to June
- August:            First half negative, second half volatile
- September:       Positive
- October:           Positive
- November:        First half of month better than second half
- December:        First half of month better than second half
- January (2011):   Positive

## **Conclusion**

All things on earth go in cycles – both high and low. The world goes on regardless. However, by knowing the rules of nature, we can avoid many pitfalls and have better chances to succeed. I would like to share these predictions with my readers around the world.

**E. HOROSCOPE PERSPECTIVES**

**TIGER 1998 1986 1974 1962 1950 1938**

Since this year is the same as yours, you are in some kind of conflict. Your money and health signs tend to be weaker. You would be prone to illnesses or accidents.
