**GEOMANCY: A SYSTEM OF CONSTRUCTING A PREDICTIVE FIGURE
ACCORDING TO THE RULES OF EARTH MAGIC. - Paul Ng**

A. OVERALL PROJECTION

This is the twelfth year of the Lower “8” Cycle of the world. Based on I-Jing, while the period between 1984 and 2043 (totaling 60 years) is “Fire-Wind Urn”, the year 2015 is “Mountain-Thunder Yi”.

I-Jing Analysis

I-Jing “Mountain-Thunder Yi” contains 2 “Yang’s” on the outside and 4 “Yin’s” inside. “Yin” continues to dominate the world. There would still be many uncertainties in the world, both politics and climate. There would also many problems to do with food, plus new sources of disease.

Life Chart Analysis

This year is composed of “wooden sheep” year, “earth tiger” month, “metal boar” day and “wooden horse” hour. The month and day both connect and conflict. Most promises between countries would not be kept in good faith. There would be new sources of conflicts.

Promising elements are fire, earth and metal. Water and wood are both negative. That means the real estate sector in stable countries would continue to grow. High tech, electronics and metallurgy would do well. Textile, travel and aviation may suffer some setbacks.

Flying-Star Analysis

The “3-blue” star is the controlling force of this year. This is the star for arguments. Its element is wood. It represents disagreements and controversies. It favors countries in the north and north-west. Countries in both west and south-east would be much weaker. The central governing force is the “thunder-mountain” trigram. This stands for transition. Hence most

countries would go through a period of instabilities, both politically and economically. USA, in particular, would be forced to participate in many trouble areas in the world.

The following would outline an analysis of orientations, businesses, politics, economies, climates and health, totaling 6 important factors affecting all of us.

Locations and Orientations

Central (negative)

The controlling force is the central “Thunder-Mountain Transition” trigram. Thunder is above mountain. On the negative side, there would be a lot of volcano and earthquake activities worldwide. There would be floods and droughts. Politically, there is a year of corrections and adjustments.

In China, events would happen just like thunders in the sky. There would be floods in southern provinces and wind storms in northern ones. A few earthquakes may hit areas such as Szechuan and Yunnan.

There would be controversies and disturbances worldwide, especially in Middle East.

East (positive)

This is the “1-White” romance center and speculative money center. Eastern districts would be very prone to flooding. There would also be plenty of problems to do with relations or sex offences. Typical places are Shanghai, Toronto, Washington DC.

South-East (very negative)

This is the “2-Black” illness center. Most sources of illness may originate from the south-east areas. Rains and flooding would also be plentiful. Places such as Hong Kong, South Florida, South Ontario are most affected. There would be major people issues in Hong Kong.

South (negative)

This is the “7-Red” receding center. Southern countries may not do too well this year. There would be disturbances in their political situations. South America and Africa may suffer from illnesses and social violence.

South-West (positive)

This is the “9-Violet” joy center. These places would continue to be stable, politically and economically. Places such as Tibet, Spain, Portugal, etc. would be calm. However, they may be vulnerable to risks of fire.

West (very negative)

This is the combination of “5-Yellow” and “Triple Conflict” centers, making it very negative. Both man-made and natural disasters would occur in the west. USA would be forced into many trouble areas in the world. Even UK would suffer from both internal and external problems, socially and politically. In China, Xinjiang would continue to be a problem area.

North-West (positive)

This is the “4-Green” learning center. There would be breakthroughs in both economy and technology among Northern European countries. In Canada, natives in North-western regions would be in better harmony. The chance for the gas pipeline to pass through becomes higher. In China, there would be discoveries of natural resources. However, many north-western regions may suffer from fire or wind storms.

North (positive)

This is the “8-white” money center. Countries in the North would do well, albeit many political problems and conspiracies. Economy in both Canada and Russia would exceed most other countries. Russia continues to post a threat to its neighboring countries.

North-East (negative)

This is the “6-White” travel center. There would be many people movements in north-eastern regions. A few earthquakes would hit. China’s north-eastern provinces would be more directly by Beijing. Economies in both Japan and Korea would fluctuate. In Canada, Quebec’s economy may recede, together with dangers in many of its aging infrastructures. In USA, such as New York, the stock market would show huge fluctuations.

Analysis of Businesses

Business involving “fire, earth, metal” would do well. Those involving “water or wood” may run into trouble. Oil and gas are still on the high side. More and more electrical or hybrid cars would appear. Much more controversies are about windmills.

There would be many merger activities. Apple would continue to lead the market, with further technical breakthroughs. Traditional electronics such as TV and audio systems may face more difficulties. The differences among TV, desktop computers, flatbed and handheld units would become less significant.
