

A. OVERALL PROJECTION

This is the fourteenth year of the Lower “8” Cycle of the world. Based on I-Jing, while the period between 1984 and 2043 (totaling 60 years) is “Fire-Wind Urn”, the year 2018 is “Lake-Thunder”.

I-Jing Analysis

I-Jing “Lake-Thunder Follow” contains 1 “Yin” and 2 “Yang” on top and 2 “Yin” and 1 “Yang” at the bottom. Most things would proceed sluggishly. Instead of being creative, there would be a lot of copycat policies. There would also be plenty of water and fire disasters world-wide.

Life Chart Analysis

This year is composed of “Earth Dog” year, “Wood Tiger” month, “Fire Rabbit” day, “Water Rabbit” hour. The combination is fairly neutral. There are hidden signs of connectivity but also conflicts. Hence most countries may lack sincerity to co-operate.

This year favors elements of “Earth, Metal, Water”, but not “Fire, Wood”. Hence favorable businesses tend to be in the mobility sector, such as travel, logistics and automobiles. Precious metals would continue to appreciate. The clothing industry may have a setback. There would be plenty of volatility and merger activities in the Hi Tech sector. Real Estate, construction and the education sectors may slow down a bit.

Flying-Star Analysis

The “9-Violet” star is the controlling force of this year. This is the 14th year of the 8-Cycle of the world. This star represents joy. Its element is fire. It represents mobility and changes. It also hints heat and fire problems in the world. Location-wise, it does not favor countries in the West, North, North-East, East, such as USA, England, Russia, Japan, Korea, etc. It favors countries in the center, South-East, South and South-West, such as China and South-East Asia.

The central governing force is the “Fire-Mountain Journey” trigram. Yang is rising. Yin is hidden inside the Yang. Hence there would still be tension among countries.

The following would outline an analysis of orientations, businesses, politics, economies, climates and health, totaling 6 important factors affecting all of us.

Locations and Orientations

Central (Positive)

The controlling force is the central “Fire-Mountain Journey” trigram. This is somewhat like walking through a volcano area, cautiously and scarily. Most countries would not dare to take drastic measures. There would not be true peace either. Areas such as China and Middle East would tend to be extra hot. Even America’s Midwest areas have many natural issues including tornadoes. This may be a year for volcano and earthquake activities.

Politically, although many countries try to establish new policies and new directions, the policies may keep changing and become not thorough.

In particular, China may have new earthquakes in its south region such as Sichuan. There would be flooding in the South East. West regions such as Xinjiang would be a bit volatile. The north may suffer from sand storms.
